SUMMARY

Computer Engineering graduate with hands-on experience in Python, Django, MySQL, and API integration for mobile apps. Skilled in building web applications, backend systems, with strong knowledge of SQL and scalable design. Quick learner, adaptable, and eager to contribute to impactful projects.

EDUCATION

Manav School of Engineering & Technology | Akola, MH 2021 – 2024
Bachelor of Computer Engineering CGPA: 7.79

Government Polytechnic Amravati | Amravati, MH 2018 – 2021
Diploma in Information Technology Percentage: 76.95%

TECHNICAL SKILLS

Backend Development: Python, Django, REST APIs, MySQL

Frontend Development: Angular, JavaScript, HTML5, CSS3

Data Analytics: Pandas, NumPy, Power BI, SQL

Developer Tools: Git, GitHub, Bitbucket, Nginx, Gunicorn

EXPERIENCE

Associate Python Developer 28 June 2025 – Present
Techquadra Software Solutions *In Office, Nagpur*

- Contributing to real-world projects using Python, Django, and MySQL, focusing on scalable backend development and efficient database management.
- Integrated and managed RESTful APIs to connect mobile applications with backend services, ensuring smooth data flow and reliable performance.
- Collaborated with the team to design, test, and deploy secure web applications, improving system reliability and user experience.

Web Developer Intern 1 Jan 2025 – 31 Jan 2025
SkillCraft Technology *Remote, India*

- Developed interactive web applications using HTML, CSS, JavaScript, and Angular, improving UI responsiveness by 30% and reducing load time by 20%.
- Built and deployed projects such as a responsive Tic-Tac-Toe game, a feature-rich stopwatch application, and an interactive to-do list, ensuring smooth user experience across devices.
- Collaborated with the team to integrate frontend components with backend logic, maintaining efficient communication between modules and increasing application reliability.

PROJECTS

Job Application Platform | *HTML, CSS, JavaScript, Django, MySQL, Bitbucket, Nginx, Gunicorn*

- Developed an online platform connecting Providers and Customers to facilitate real-time job postings.
- Implemented a payment module and optimized backend code to improve efficiency; currently working on support features.
- Designed and implemented the backend architecture to ensure secure, scalable transactions and robust API integration.
- Collaborated with team members through code reviews, improving maintainability and reducing API response times.

School ERP | *Django, REST APIs, MySQL, Bitbucket, Gunicorn, Nginx*

- Developed a scalable web application using Django and MySQL to manage school operations.
- Created and deployed RESTful API endpoints for Flutter mobile apps and the web interface, supporting multiple user roles.
- Optimized complex SQL queries and backend logic, improving processing speed by 30%.

AI Chatbot | *Python, FastAPI, MySQL, Bitbucket, Gunicorn, Nginx*

- Developed a scalable web application using FastAPI and MySQL for AI-driven chat interactions.
- Created and deployed a chatbot capable of handling concurrent user queries efficiently.
- Optimized code for simultaneous user handling and faster response generation.
- Implemented NLP using Sentence Transformers to process user queries, extract intent, and return the top relevant responses.

PERSONAL/ACADEMIC PROJECTS

Tech Farm (Real-time Agricultural Marketplace) | *HTML, CSS, JavaScript, Django, MySQL, Git*

- Developed an online platform for farmers, buyers, and sellers to interface with each other, facilitating real-time trading and market analysis.
- Implemented a live market data system with Django Channels and WebSockets to improve trade decision-making.
- Led the backend architecture design, ensuring secure, scalable transactions and robust API integration.
- Collaborated with a team for code reviews, improving maintainability and reducing deployment errors by 25%.

Personal Portfolio | *HTML, CSS, JavaScript, Web3 Forms*

- Developed a personal portfolio website to showcase my projects, skills, and experience.
- Optimized SEO and verified the site with Google Search Console to improve visibility and ranking on search results.
- Deployed the portfolio on Vercel, making it publicly accessible and fully functional online.

Online Pharmacy Management System | *HTML, CSS, JavaScript, Django, MySQL*

- Developed a scalable web application using Django and MySQL to manage over 1,000 product records.
- Created and deployed RESTful API endpoints to manage products and orders effectively, minimizing stock mismanagement by 40%.
- Optimized complex SQL queries and backend logic, boosting transaction processing speed by 30%.

CERTIFICATIONS

Naresh IT Full Stack Python Training

- Completed an 8-month offline training program in Python, Django, and full-stack development.
