SUMMARY

A motivated Full Stack Developer with a strong focus on backend development, skilled in Python, Django, Flask, and cloud technologies. Experienced in designing scalable APIs, optimizing database performance, and automating workflows. Passionate about building secure, high-performance applications and integrating cloud solutions. As a fresher, I am eager to learn, adapt quickly, and take on new challenges in backend and full-stack development.

EDUCATION

Manav School of Engineering & Technology Akola, MH <i>Bachelor of Computer Engineering</i>	2021 – 2024 CGPA: 7.79
Government Polytechnic Amravati Amravati, MH <i>Diploma in Information Technology</i>	2018 – 2021 Percentage: 76.95%

TECHNICAL SKILLS

Backend Development: Python, Django, REST API, MySQL

Frontend Development: Angular, JavaScript, HTML, CSS

Data Analytics: Pandas, NumPy, Power BI, SQL

Cloud Services: AWS (basic), Docker (basic)

Developer Tools: Git, GitHub, VS Code, PyCharm, Jupyter Notebook

EXPERIENCE

Web Developer <i>SkillCraft Technology</i>	Jan. 2025 – Feb. 2025 <i>Remote, MH</i>
- Developed multiple frontend projects using HTML, CSS, JavaScript, and Angular, improving UI responsiveness by 30% and reducing load time by 20%. - Built a dynamic to-do list app with real-time task management using JavaScript and Local Storage, increasing user productivity by 40%. - Created a responsive Tic-Tac-Toe game with smooth gameplay and accurate move tracking, leading to a 95% user satisfaction rate. - Implemented a stopwatch application with start, pause, and lap tracking features.	
Python Developer Intern <i>Cognifyz</i>	Jan. 2025 – Feb. 2025 <i>Remote, India</i>
- Developed Python-based automation tools, reducing manual effort by 50%. - Implemented features such as password validation and email verification, improving security and reducing unauthorized access attempts by 40%.	

PROJECTS

Online Pharmacy Management System HTML, CSS, JavaScript, Django, MySQL
- Developed a full-stack web application using Django and MySQL, efficiently managing over 1,000 product records. - Implemented an automated inventory management system, reducing stock mismanagement by 40%. - Optimized database queries and backend logic, improving transaction speed and system efficiency by 30%.
Tech Farm – Real-time Agricultural Marketplace HTML, CSS, JavaScript, Django, MySQL, Git
- Built a digital platform connecting farmers, buyers, and sellers, enabling real-time trading and market insights. - Developed a live market data system using Django Channels and WebSockets, enhancing trade decision-making. - Led the backend architecture design, ensuring scalability and secure user transactions. - Collaborated with a team for code reviews, improving maintainability and reducing deployment errors by 25%.

CERTIFICATIONS

- Naresh IT Full Stack Python Training (Offline 8 month)
- Microsoft PowerBI Certification
